

Black & Decker ***Workmate***

-IT'S LIKE GETTING AN EXTRA PAIR OF HANDS!

ACCURACY

Giant vice holds even large items like doors or window frames — rock steady.

PORTABILITY

Light weight and unique folding construction lets you take the Workmate "on site" for maximum convenience.

SPACE SAVING

In operation the Workmate needs less than 7 square feet, and folds down to the size of a suitcase for storage.

SAFETY

Vice holds workpiece securely leaving both hands free for maximum safety when using hand or power tools.

Service Facilities. There is a national network of Black and Decker owned Service Stations where you can send or bring the Workmate for Service or repair. Each is staffed by a team of skilled craftsmen led by factory trained managers. These are backed up by over 500 Service Collection Points. Look for the sign alongside or check in the Yellow Pages of your Telephone Directory under "Electric Tool Manufacturers".

Guarantee. In common with other Black and Decker products, the Workmate is fully guaranteed. Full details are given on the guarantee card supplied with the Workmate. In keeping with our policy of continued product improvement, Black and Decker reserve the right to alter the specification and prices of the Workmate without notice.

HEIGHT TO DUAL HEIGHT PROFESSIONAL MODEL £5.95***

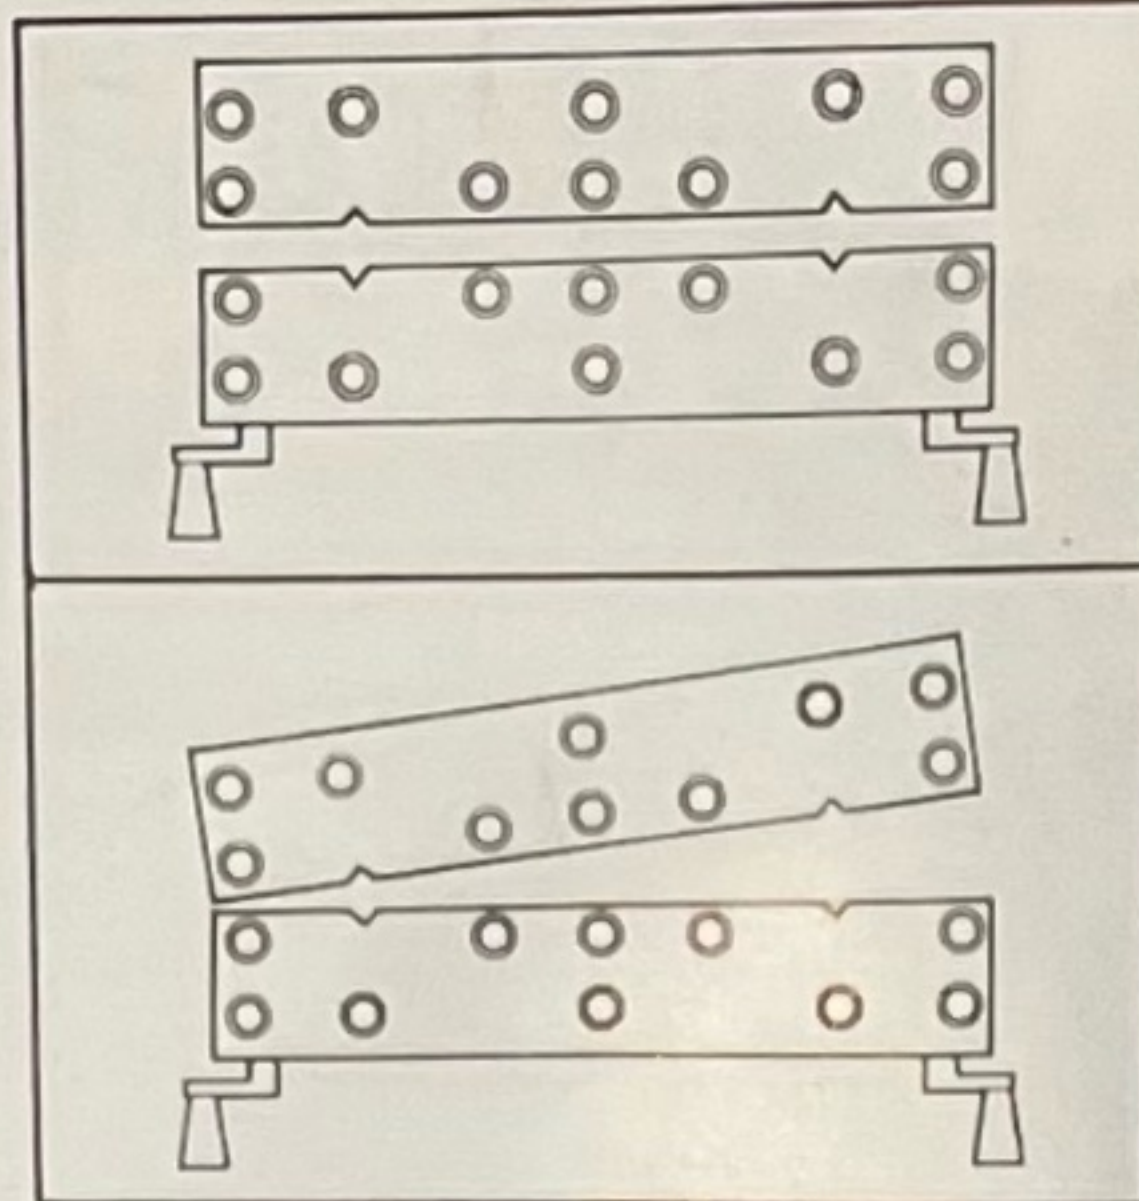

Black & Decker Workmate in action

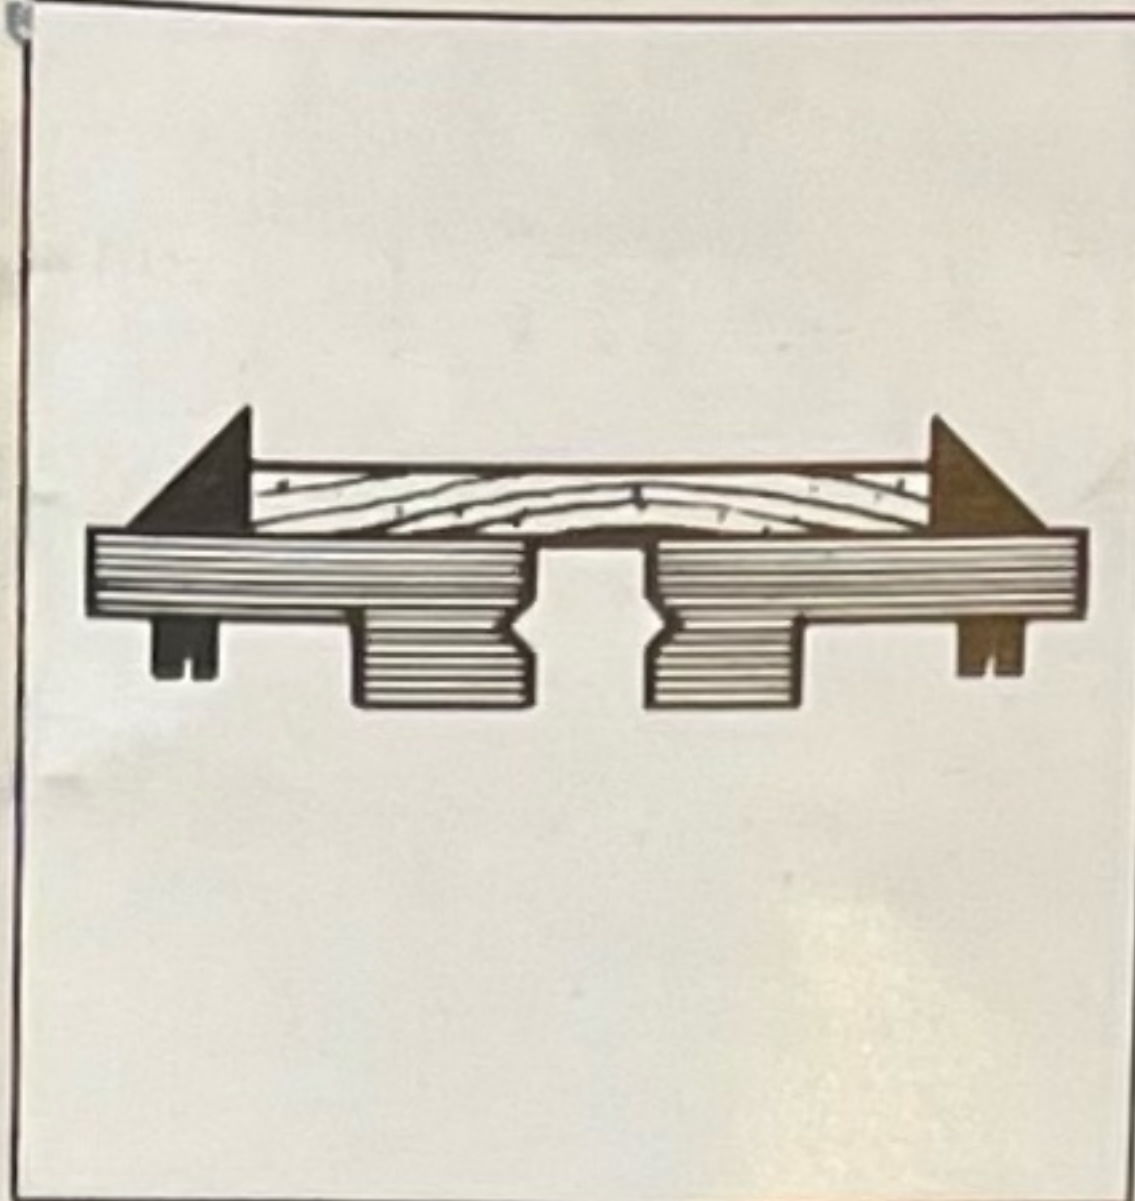

Single height (model WM225) has a working height of 23 1/4" (590mm)—the comfortable height for the vast majority of jobs.

Dual height professional (model WM325) has folding lower legs for added versatility offering two working heights of 23 1/4" (590mm) and 32 1/4" (820mm). A kit of legs to convert the WM225 to a dual height WM325 is available, catalogue number WM275.

The giant 29" (740mm) vice has a control screw at each end, enabling parallel or tapered material to be held securely.

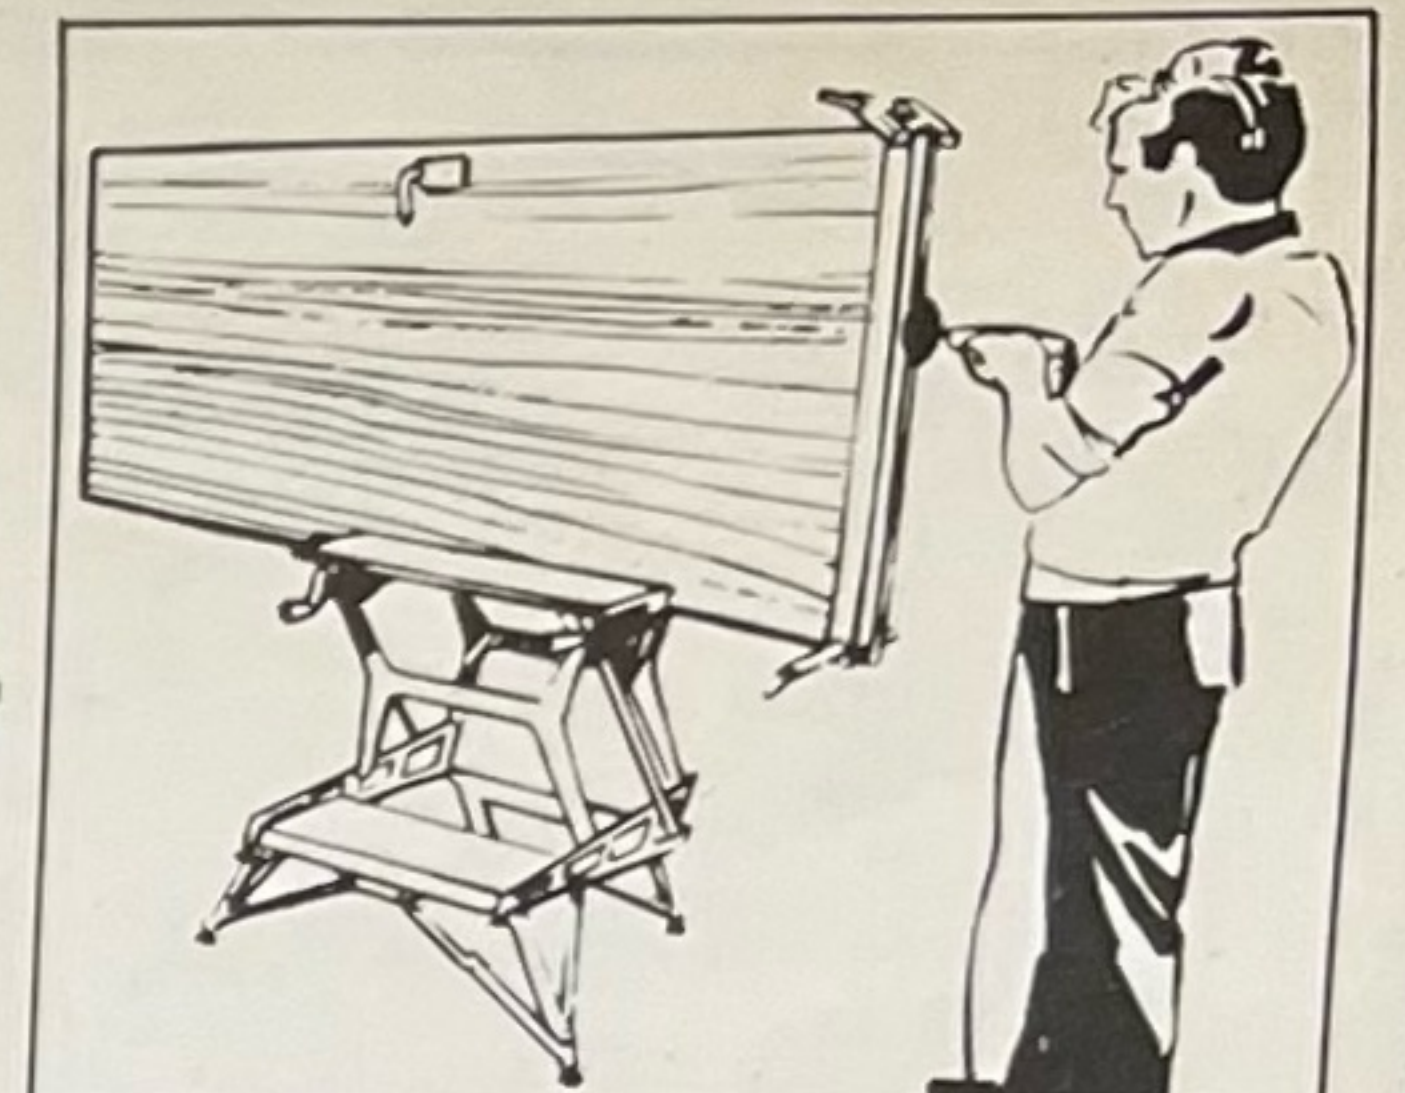

Four vice pegs are provided free with the Workmate. These fit into a series of holes in the vice bars, and effectively more than double the normal 4" (100mm) vice capacity. They are ideal for holding irregularly shaped work pieces.

Your Workmate is lightweight and extremely portable.

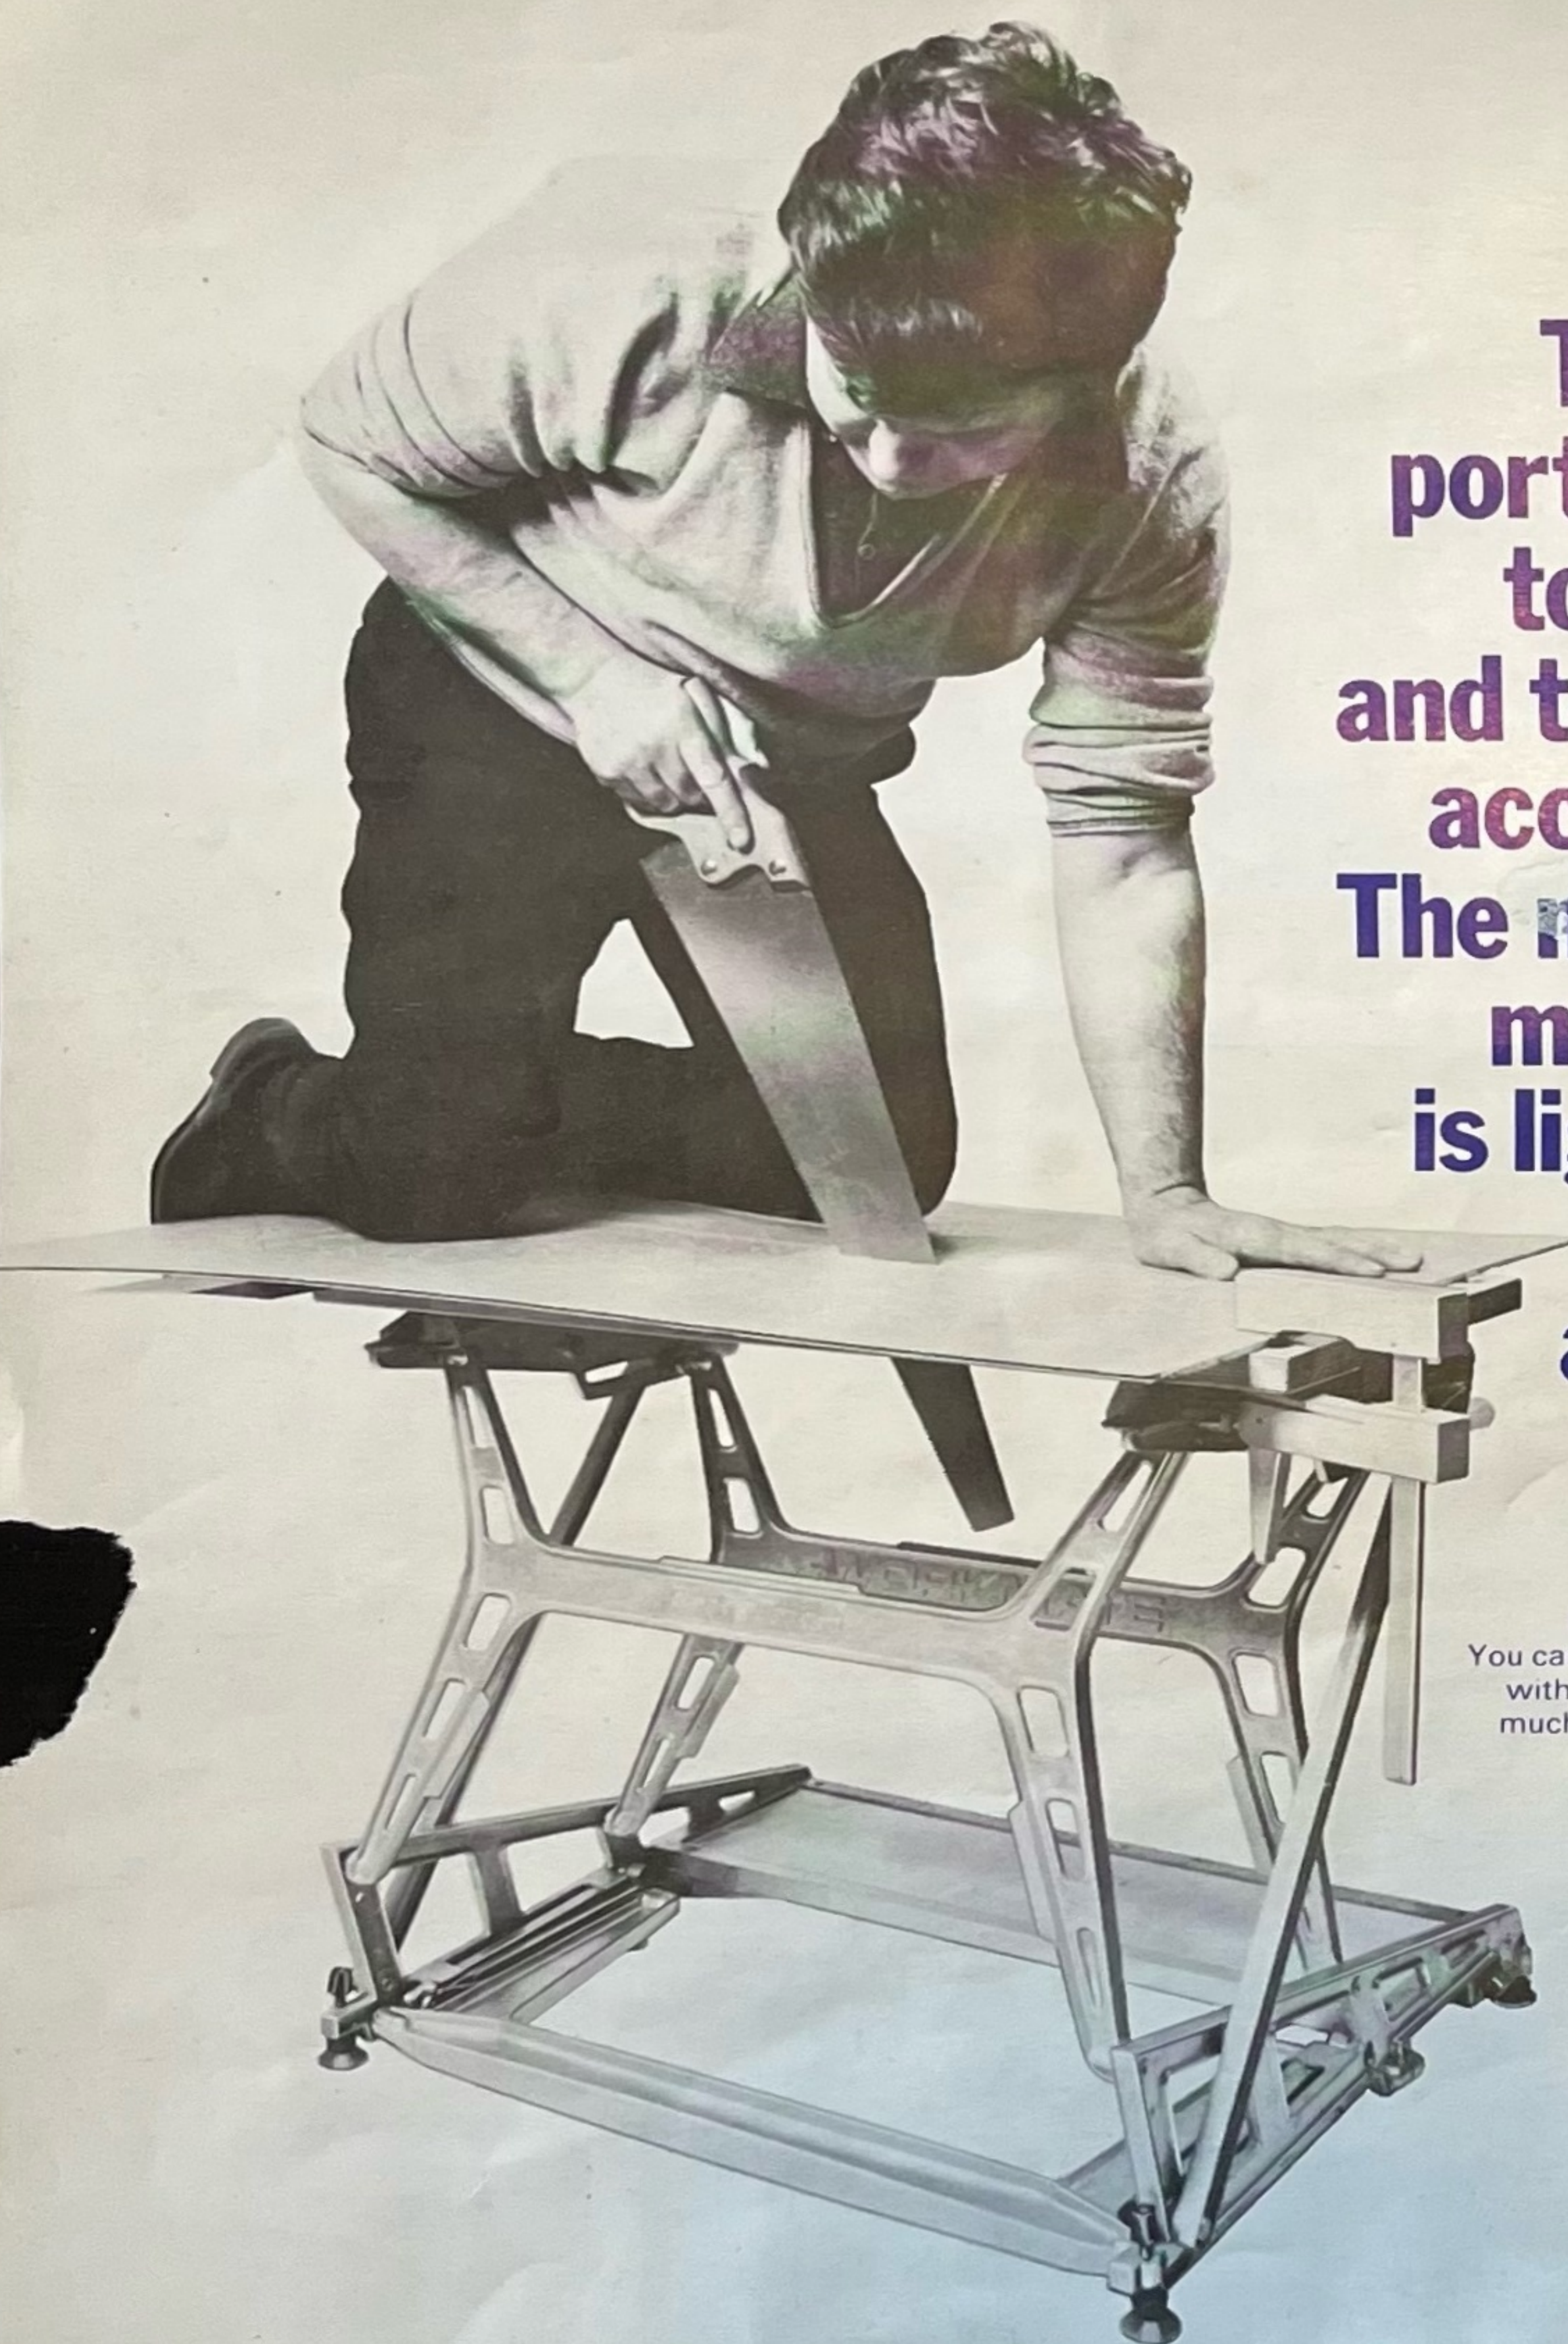

The Workmate all purpose portable work bench is designed to make the most of your skill and to increase your capability for fast accurate work in any location. The massive vice bars hold almost any material securely. The Workmate is lightweight and folds down to a compact shape, it can be taken anywhere, in or out of the house, whatever the job.

Securely clamp a door, window frame or other bulky article for easy planing, shaping, sanding etc.

Sawing. Tapered or parallel workpieces can be securely clamped between the vice bars for safe accurate sawing.

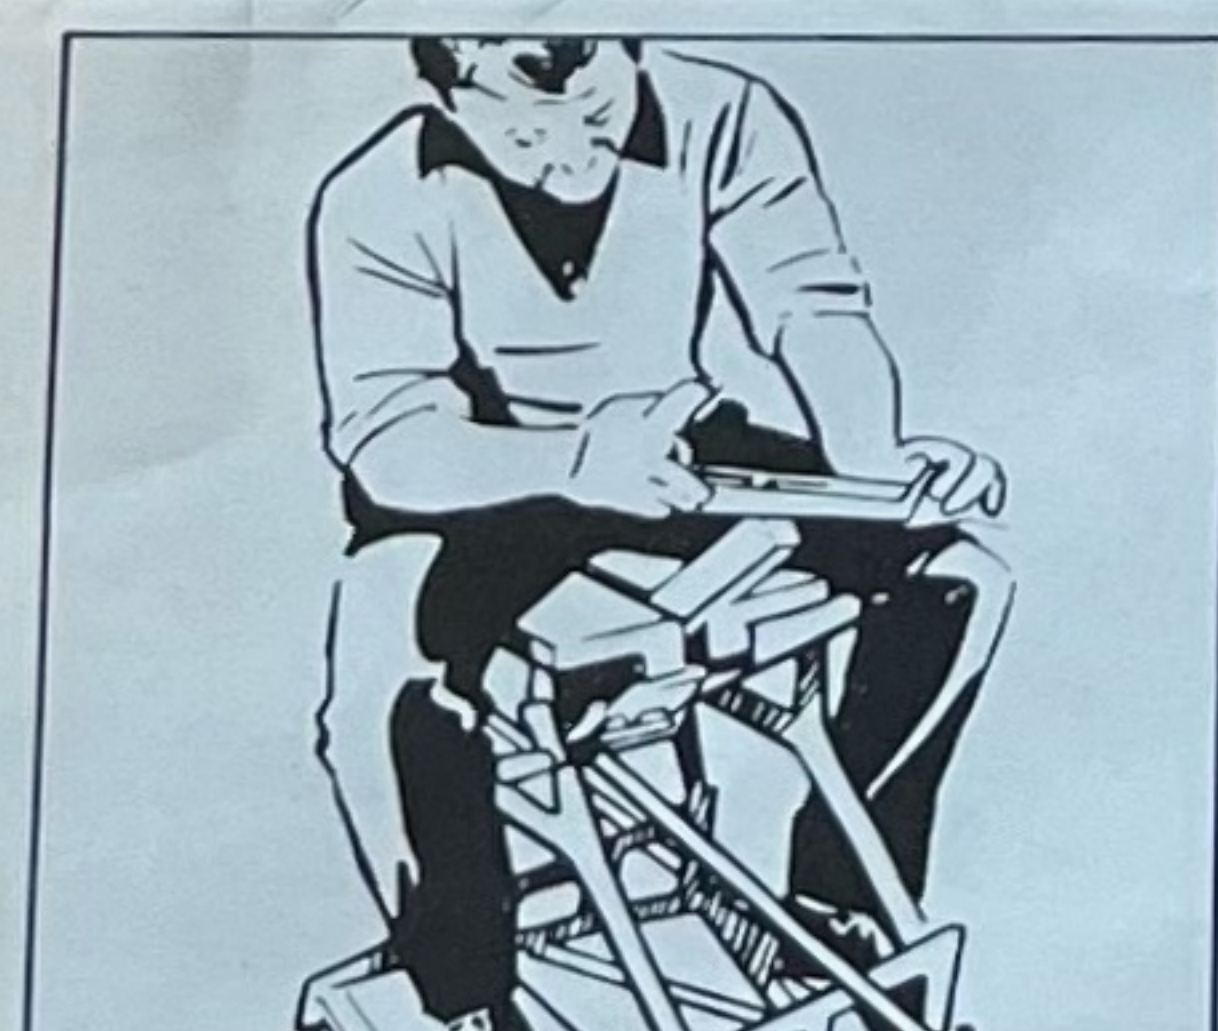

Saw panels up to 8' x 4". You can hold even the thinnest panels with all your weight, and they cut much better being supported right along the cutting line.

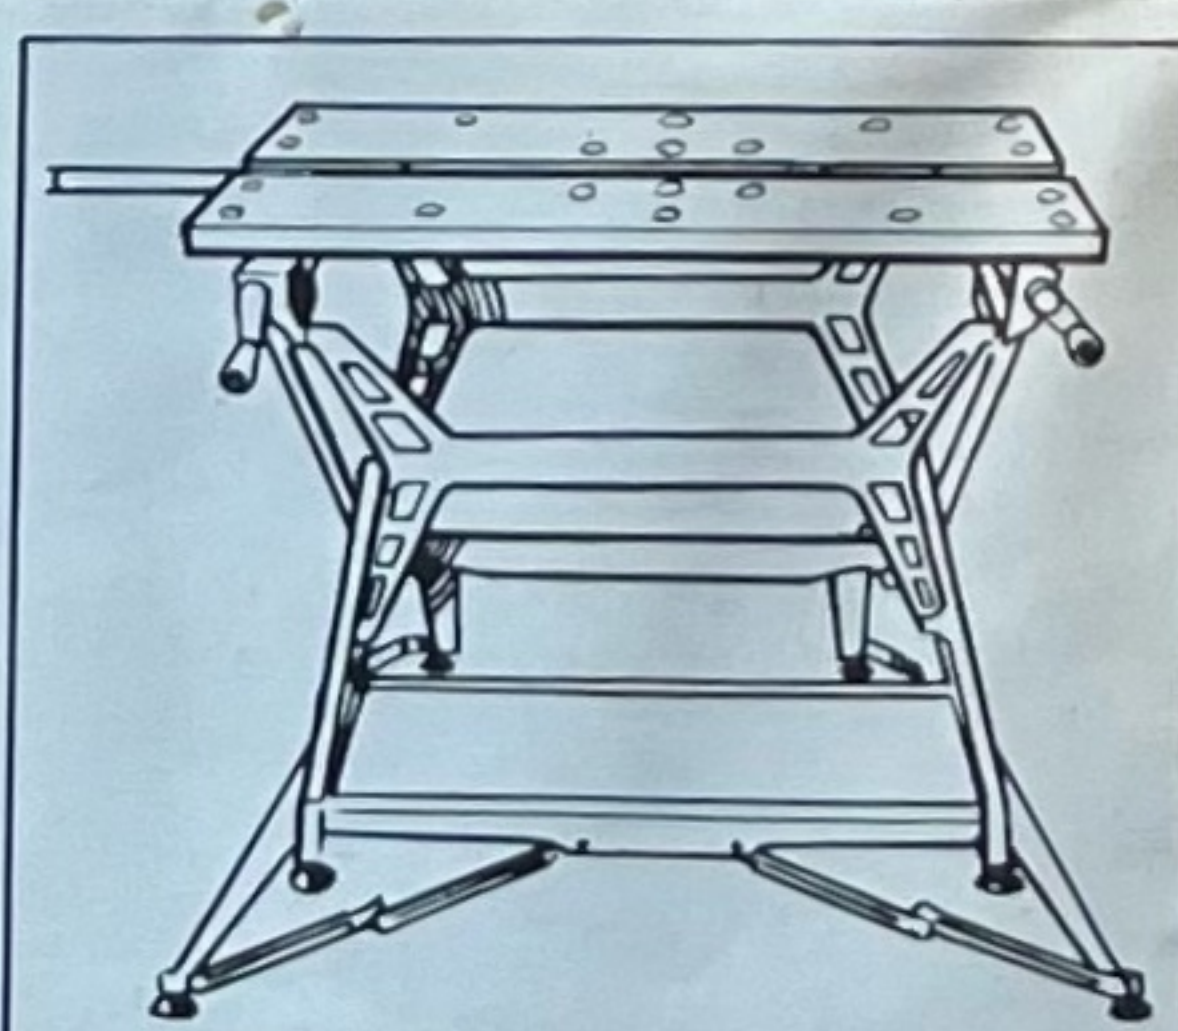

The vice jaws hold the workpiece securely for accurate chiseling, jointing, carving etc.

A metal working vice can be used with the Workmate—simply mount it on a wooden board, screwed to a batten and clamp the batten between the vice bars.

The massive vice bars hold the work piece securely for shaping, forming, sanding etc.

The vice bars have special grooves for holding metal and plastic pipes, rods, guttering etc.

Sawing and jointing of long boards or battens is easy and accurate with the Workmate.

Power tools such as a circular saw, vertical drill stand, woodworking lathe, can be clamped within the vice jaws using a wooden board screwed to a batten.
